Goals

- I am seeking a developer position in the software industry.

Summary

- I am a highly motivated full-stack developer with an excellent coding skillset and working knowledge of: **HTML, CSS, Javascript, jQuery, AJAX/APIs, nodeJS, Express, handlebars, firebase, SQL & more.**
- I have an excellent background in the fields of medicine, biochemistry, and molecular biology which adds to my qualifications. I am transitioning my career from medicine into the exciting software industry.

Software and Technical Education

- Graduate of the Web Development / Full Stack Software Bootcamp at University of Pennsylvania, College of Liberal and Professional Studies.** October 2019 to January 2020

Projects and Portfolio: <https://github.com/sahasra101>

Rentable: full-stack app on Heroku that helps the user determine the profitability of renting a property. App technologies include: Passport.js, HTML/CSS, JavaScript, jQuery, MySQL, Zillow API, Google Maps API.

Omega: MERN-stack app deployed on Heroku that helps the user set up a meaningful exercise regimen. App technologies include: React, JSON Web Token, HTML/CSS, JavaScript, MongoDB powered Mongoose.

City Recommendations: useful app that allows the user to look up to 3 categories using the Yelp API. App technologies used include: HTML/CSS, Materialize, JavaScript, Google Maps API.

Space.com News Scraper: handy app that allows the user to scrape the latest articles from Space.com. App technologies include: HTML/CSS, Bootstrap, JavaScript, jQuery, nodeJS; npm packages: express, axios, cheerio, handlebars and mongoose (mongo dB).
